

## VAERS Results

Recovered	Events Reported	Percent (of 300,858)
No	34,381	11.43%
Yes	171,036	56.85%
Unknown	77,731	25.84%
Missing	17,710	5.89%
<b>Total</b>	<b>300,858</b>	<b>100.00%</b>

**Notes:**

**Caveats:** Some items may have more than 1 occurrence in any single event report, such as Symptoms, Vaccine Products, Manufacturers and Event Categories. If data are grouped by any of these items, then the number in the Events Reported column may exceed the total number of unique events. If percentages are shown, then the associated percentage of total unique event reports will exceed 100% in such cases. For example, the number of Symptoms mentioned is likely to exceed the number of events reported, because many reports include more than 1 Symptom. When more than 1 Symptom occurs in a single report, then the percentage of Symptoms to unique events is more than 100%. [More information.](#)

Data contains VAERS reports processed as of 2/26/2010. The VAERS data in WONDER are updated monthly, yet the VAERS system receives continuous updates including revisions and new reports for preceding time periods. [More information.](#)

DISCLAIMER: Please note that VAERS staff follow-up on all serious and other selected adverse event reports to obtain additional medical, laboratory, and/or autopsy records to help understand the concern raised. As such, coding terms in VAERS may change based on the information received during the follow-up process. These changes are reflected in the monthly updates of VAERS data on WONDER. VAERS data on WONDER should be used with caution as numbers and conditions are updated. Note that the inclusion of events in VAERS data does not infer causality.

**Help:** See [VAERS Documentation](#) for more information.
